EXPERIENCE

Whip Media New York, NY
UI Developer 12/2015 - 06/2023
- Build the frontend of the company B2B SaaS single-page application using the Vue + Vuex ecosystem
- Worked closely with client services to translate customer requirements into software solutions
- Created Sass utilities that boosted developer efficiency and maintained consistent styling across components
- Directed and designed the dashboard UI/UX of the SaaS platform using Sketch software, resulting in increased client satisfaction and engagement
- Used Zeplin to establish and uphold application Style Guide, ensuring product features adhered to design standards and practices, resulting in a seamless and cohesive user experience

SBG Media New York, NY
Front-End Web Developer/Designer 02/2015 - 12/2015
- Designed and implemented catchyfreebies.com landing page and constructed the new site color template
- Contributed to the site UI/UX design, landing page design, and launch of majorsweeps.com
- Revamped all pages of healthysurveys.com to transition legacy PHP code to in-house MVC architecture
- Designed/coded confirmation email for catchyfreebies.com, majorsweeps.com, and besthotsurveys.com
- Designed/coded catchyfreebies.com email newsletter templates for the email marketing team to boost engagements and click through rates

Charged.fm New York, NY
Front-End Web Developer Intern 08/2014 - 02/2015
- Created UI components using Sass and OOCSS principles for the new charged.fm website
- Effectively used git-based workflow for in-house project collaboration, management, and development
- Assisted in creating the wireframes of charged.fm mobile iOS and Android apps using Sketch software and Invision
- Enhanced and managed the frontend of e-commerce ticketing sites for minor-league baseball teams

PROJECTS

Readme Maker https://readme-maker.com
- A README editor that enables developers to quickly create and customize professional readmes for their projects
- Built with Next.js, Zustand, dnd-kit, react-markdown, shadcn/ui, TailwindCSS, and deployed on Vercel

Moneyvisor https://github.com/qpan/moneyvisor
- A mobile responsive wealth management application. Tracks different sources of incomes and expenses on a monthly basis
- Created using React with Redux Toolkit Query, and interfaces with RESTful API endpoints from a JSON-Server

T-Work https://twork.site
- An agile project management tool. Tracks and oversees projects and provides a kanban board to visualize workflows
- Built with Vue and Express, deployed on Render, and interacts with MongoDB hosted on MongoDB Atlas
